OVERVIEW

AMikids, Inc. (AMikids) and Evidence-Based Associates (EBA) are seeking qualified community-based Direct Service Providers (DSPs)/prospective subcontractors to provide clinical services, supportive programs and supervision practices to youth (and their families) involved with the Virginia Department of Juvenile Justice (VA DJJ). DJJ is in the midst of transformation which includes the development of a continuum of services associated with a wide variety of custodial and community settings, including short and longer term residential settings, community based alternatives to custody, and various other types of interventions designed to enhance public safety and to meet the needs of the involved youth and families. The ultimate goal of these services is to enable youth to achieve positive life outcomes as evidenced by a range of indicators including engagement in school and work; stable housing; and abstinence from delinquent behavior. This RFQ process will serve both as a request for qualifications from interested parties and an initial assessment of the availability of services across the system.

BACKGROUND:

DJJ has contracted with AMikids and with EBA to implement and manage a continuum of services provided to Virginia's Juvenile Justice involved youth with regards to a variety of residential and community-based programs. Both agencies seek to support DJJ's efforts and to collaborate, coordinate, and align transformation efforts as much as possible (e.g., by jointly issuing this RFQ).

The goals of this initiative are to a) use best-practices and evidence-based interventions that have been shown to reduce juvenile recidivism and improve long-term outcomes; and b) achieve measurable reductions in the rate of re-arrests, re-adjudications, and commitments (or recommitments) to Juvenile Correctional Centers. For more background on evidence-based models and interventions, See Appendix A.

TARGET POPULATION(S)

The primary target population(s) will include youth involved at various stages of the Juvenile Justice system (and their families) i.e., youth who are placed on probation or parole after 1/1/17. These youth, including males and females, typically ages 13-20 at the time of referral, may have been committed to Direct Care and are scheduled for release/reentry, or they may be on DJJ community supervision (parole or on probation). Youth eligible for services under this RFQ will be at higher risk of reoffending and are therefore more likely to require intensive, individualized services to obtain the supports needed to achieve positive outcomes. These youths and their families will require services across the Commonwealth, but services must be delivered in close geographical proximity to where the youth and families reside.

Youth referred for these services demonstrate various levels of criminogenic risk to reoffend and often display the following behaviors and needs:

- Delinquent history and propensity to commit delinquent acts/crimes in the future
- History of running away from home, foster care, and/or residential placements
- History of association with anti-social companions (i.e.: favorable attitudes towards violence, dishonesty, and rule breaking)

- Impulsivity, poor emotional regulation and inadequate decision making skills
- Low levels of educational achievement
- History of low family affection/history of poor supervision
- History of substance abuse
- History of self-destructive behavior
- Mental health diagnoses (such as post-traumatic stress disorder, depression, Oppositional Defiance Disorder, and Attention Deficit Hyperactivity Disorder)
- Low or limited functioning youth
- History of poor school performance
- Lower levels of job readiness and independent living skills
- Need for focused intensive transition and community reintegration services
- History of trauma and exposure to violence
- Limited parenting skills

ELEMENTS OF THE SERVICE ARRAY:

AMIkids will serve as Regional Service Coordinator (RSC) acting on behalf of DJJ in the Eastern and Southern regions. EBA will serve as RSC on behalf of DJJ in the Western, Central, and Northern regions. Both RSCs seek community-based and residential service providers whose programs address the multiple factors known to be related to crime and delinquency across settings and systems within which youth are embedded. The identified services should promote behavior change in the youth's natural environment, using the strengths of each system (e.g., family, peers, school or work, neighborhood, community) to facilitate change.

AMIkids and EBA are seeking Direct Service Providers (DSPs) that are capable of delivering, are qualified to deliver, or have an interest in providing, the following services and programs. While one or more of these program options may not be pertinent to all DSPs, AMIkids and EBA are interested in hearing from all candidate DSPs within each region regarding their ability, willingness and interest in providing:

- **Individual Clinical Services**
 - Individual therapy including individual substance abuse treatment, individual substance abuse relapse prevention, individual YSB treatment, and individual YSB relapse prevention (**please also indicate whether Motivational Interviewing (MI) will be utilized as part of the treatment or service)

The services and programs described above will be implemented in stages, in coordination with the RSCs, as described in Appendix B, Staging of Services Overview.

The DSPs shall work in collaboration with their RSC to ensure that all services are provided within a continuum of services, and that continuum shall maintain strict adherence to a **'no-reject/no-eject' policy** by all DSPs regarding youth and families referred for or receiving services. While the performance measures, performance targets and the specific of this No-reject/No-eject policy will be mutually developed between DJJ, the RSC, and the DSPs, the No-reject/No-eject policy will be non-negotiable and is considered an essential element in the successful performance of DSPs and Service Coordinators.

Following a successful response to this RFQ, DSPs will be expected to establish and maintain strong working relationships with Court Services Unit (CSU) staff to ensure youth and families are referred to the appropriate services, that initiation of services is accomplished in a timely manner, and that barriers are mitigated. The DSP shall ensure that program non-compliance is identified quickly and managed through strength-focused strategies to engage the youth and family in making positive changes. DSP's will be expected to facilitate and support strong working relationships between DJJ (including CSU's) and the RSCs, as outlined above.

SCOPE OF SERVICES:

As part of this community-based initiative, Direct Service Providers (DSPs) will:

1. Collaborate with the RSCs and DJJ/CSU in the delivery of services according to the terms of the Subcontractor Agreement, which must be executed between the DSP and the RSC prior to the delivery of services;
2. Hire and support the requisite clinical and administrative staff, as needed;

3. When initiating one of the identified evidence-based programs (e.g., FFT, MST or ART) (“EBPs”), follow the program and staffing guidelines provided by the EBP;
4. Work with representatives from/partners of DJJ in the identification of outcome measures and design of data collection tools;
5. Participate in regular and, as necessary, ad hoc meetings with the RSC Project Manager in order to exchange program and evaluation information;

7. Provide data to the RSC on youth participating in the project in order to evaluate the effectiveness of the project design; and
8. Cooperate fully with any evaluation of this community-based services initiative, which includes collecting performance metrics data, assisting the RSC in monitoring and evaluating DSP performance; and participating in any program audits.

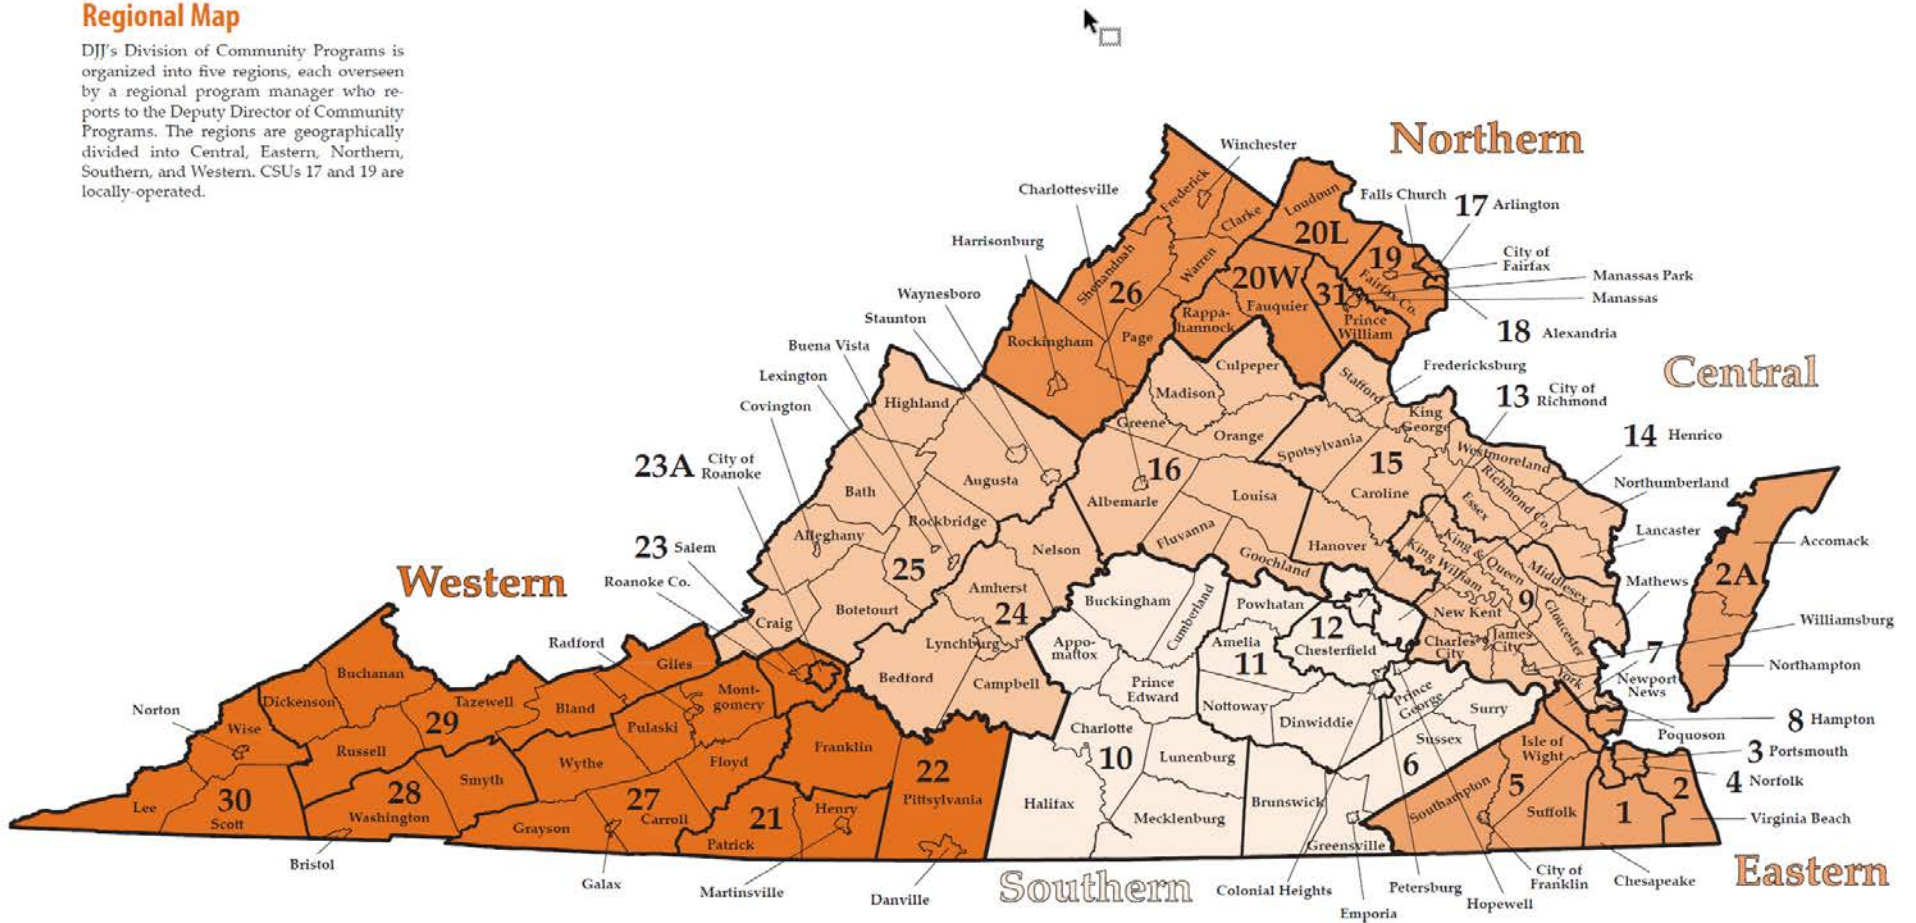

In addition, DSPs will be expected to abide by the General Terms and conditions, which are attached as Appendix C.

SUBMITTAL INSTRUCTIONS:

Respondents should apply for any service that they wish to provide or could envision providing in the future – consistent (for some) with earlier requests for an expression of interest. We anticipate that DSPs may propose to continue to provide the current treatment services and models, but the expectation is that at the over the course of the transformation, DSPs will shift to best practices and evidenced-based treatment models with guidance and support from DJJ and the RSCs. Please review the regional map below to locate your service areas of interest.

Regional Map

DJJ's Division of Community Programs is organized into five regions, each overseen by a regional program manager who reports to the Deputy Director of Community Programs. Overview of Evidenced-Based Interventions

The concept of evidence-based practice was developed outside of criminal justice and is commonly used in other applied fields such as medicine, nursing, and social work. In criminal justice, this term marks a significant shift by emphasizing measurable outcomes and ensuring that services and resources are actually effective in promoting rehabilitation and reducing recidivism. DJJ is committed to supporting this focus on better outcomes for the entire juvenile criminal justice system and for those involved in it. Because there are numerous definitions of evidence-based practice, For the purpose of this RFQ, evidence-based practice consists of three basic principles:

1. Evidence the intervention is likely to work, i.e., produce a desired outcome, and is considered a research based or promising practice; and/or utilizes components of research based practices proven to be effective
2. Evidence the intervention is being carried out as intended; and
3. Evidence allowing an evaluation of whether the intervention worked.

Evidence-based practices involve using research-based and scientific studies to identify interventions that reliably produce significant reductions in recidivism, when correctly applied to offender populations through the use of the following four principles of effective intervention:

1. Risk Principle – focuses attention on the crucial question of WHO is being served and calls for targeting higher risk youth.
2. Need Principle – requires that priority be given to addressing criminogenic risk/need factors with a clear focus on WHAT programs are delivered, and how services are matched to the highest potency needs of individual youth and families.
3. Treatment Principle – conveys the importance of using behavioral treatment approaches to achieve the best possible outcomes and requires attention to the question of HOW programs are delivered.
4. Fidelity Principle – draws attention to HOW WELL programs are delivered and reiterates the necessity that programs be implemented as designed.

Successful implementation of evidence-based practices also includes:

- Organizational development to create and sustain a culture accepting of best practices and evidence-based approaches;
- A commitment to initial and ongoing professional development and training;
- Use of validated risk/needs assessment tools;
- A commitment to data collection and analysis for the purposes of ongoing monitoring, reporting, and decision making;

- Use of programs grounded in evidence-based principles and known to produce positive juvenile justice outcomes;
- Quality assurance activities to ensure program fidelity;
- Performance management to improve programs and policies; and
- A “systems change approach” to develop collaborations so that tasks, functions and sub-units work effectively together and not at cross-purposes.
